## ABOUT US

TÜYAFED is a head organization founded in associations operating in the Software and IT industry. We have three main purposes as a head organization.

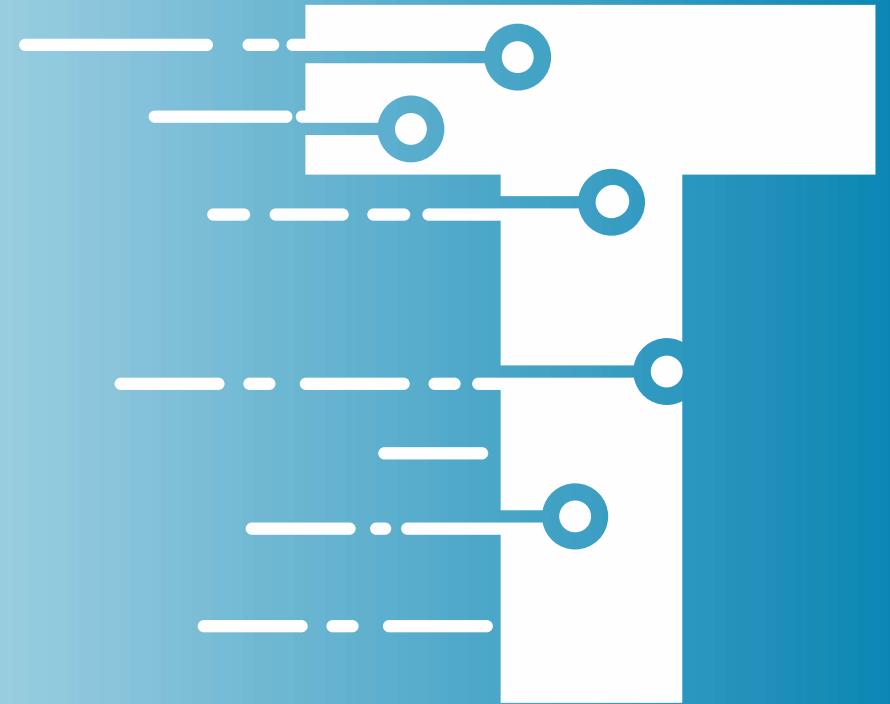

The purpose of the Software Federation is to build a strong and large management staff at home and abroad with economical, sociological policies and strategies.

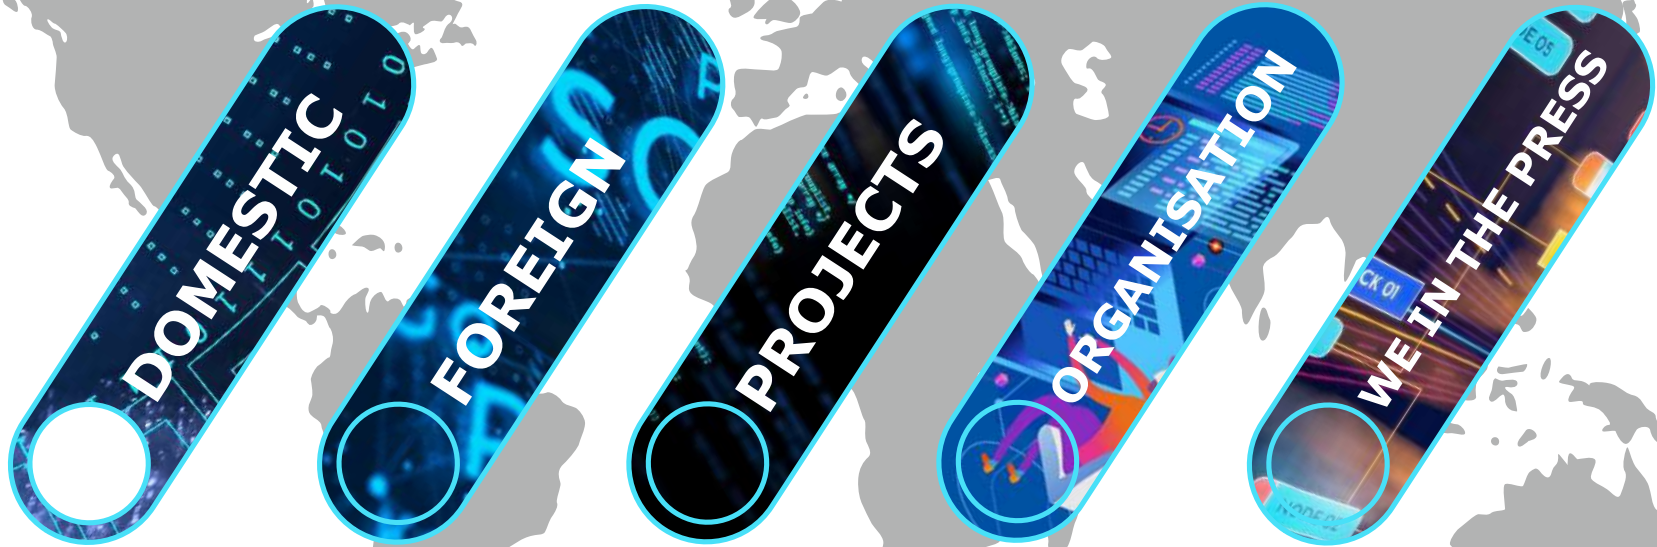

As our domestic activities, our purposes are being unionize on software by providing industry union accelerated Digital Transformation, establishing software parliaments in broad chambers of commerce in Turkey, and integrate with firms, Industry 4.0 and 5.0 Integration, Development of emerging regions, Education studies, Building R&D Incubation centers, and bring together angel investors with new inventions. Together with the healthy work of the committees established in this scope, TÜYAFED will contribute to the economic prosperity of our country.

As our foreign activities, our major project that will unite Asia and Europe will gather the Republic of Turkey, the Balkan States, the Turkish Republics, the Caucasus, and the Neighboring countries under the same roof and combining local-foreign software. This paves the way the exportation of software and hardware to developed countries, primarily Europe, and provides foreign currency inflow into our country.

Providing technology transfers and paving the way for value-added exportations and guiding all our micro-small or large-scale manufacturers abroad with the foreign missions we have established. It is our primary goal to build the infrastructure that our companies in our country need to be a Global-scale company.

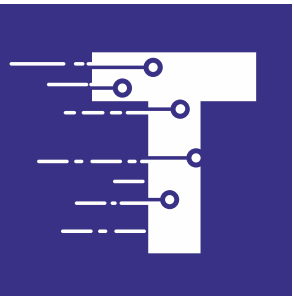

And our purpose as workshop targets is to bring together highly placed and experienced firms from the entire industry to create competitive conditions for our members and members in foreign markets by working in value-added industries and industry-based workshops.

- ✓ Educational infrastructure studies, R&D incubation centers and Artificial Intelligence studies
- ✓ New Inventions & Informal Investments & CodeFesd Competitions
- ✓ Press and Broadcast Events

# FOREIGN ACTIVITIES

# AVAILABLE 25 COUNTRIES

2025  
TARGET  
100  
COUNTRIES  
REPRESENTATIVE

We are striving hard to increase exportation, which is extremely important for our country. Representatives have been established in **25 countries around the world.**

In addition, the **European TüYAFED** will be a bridge to our companies that want to build and export computing, technology, and software to 27 European countries from Germany.

# TURKEY TOP 10 ECONOMY WILL CARRY TARGETS WITH BRIDGE BEING

## Foreign Purposes;

We want to gather the Turkish Republic, the Balkan Countries, the Turkish Republics, the Caucasus States, and other neighboring countries under the same roof with a major project that unite Asia and Europe. By bringing together local and international IT and Software products, we are working to increase the inflow of foreign currency into our country by making way for IT, Software, and hardware exports to developed countries, especially European countries.

- ✓ TÜYAFED is an organization that provides employment via TÜYAFED coordination on social platform to the developed countries by gathering Balkan Countries, Turkish Republics, Caucasus countries and neighboring countries' software.
- ✓ To pave the way for software and equipment exports to Europe and the developed world. To provide technological transfers and make them value-added for exportation.
- ✓ To guide our manufacturers on a micro, medium, or large scale, who want to go abroad and build the infrastructure needed for companies to be global companies.
- ✓ To build tourism infrastructure in Software and Technology.
- ✓ To take firms abroad in groups and strengthen connections.
- ✓ TÜYAFED is planning to expand the number of representatives in 25 countries, supporting companies that want to export abroad and have special visitation plans.

## INTERNATIONAL PROTOCOL AGREEMENTS

As a result of overseas studies and negotiations, MOU agreements were made with associations and federations operating in the fields of software, informatics and technology, and cooperation processes were initiated. By the end of 2023, we aim to increase the number of contracted countries to 50. So far, our communication process with 1450 different International Technology and Software Associations, Federations and Chambers of Commerce continues.
